

KENNETH RABINA

Computer Science Graduate at Arellano University - Manila

 (+63) 9100282078

 kennethrabina400@gmail.com

 Novaliches, QC

PROFILE SUMMARY

Computer Science graduate with skills in programming, graphic design, and web development. Dedicated to building effective digital solutions, learning new technologies, and contributing to organizations through my technical expertise and creativity.

WORK EXPERIENCE

Software Developer Intern | Lightweight Global Tech Solutions Corp., Quezon City
(May 2025 - August 2025)

- Developed and tested software solutions, prototypes, and feature implementations to support project requirements.
- Conducted research and development (R&D) activities to evaluate and determine the feasibility of new features and technologies for team projects.
- Assisted in improving existing applications by researching innovative approaches and validating proposed enhancements.

KEY SKILLS

- **Programming Languages:** Python, C#, GDScript, JavaScript
- **Frontend:** Next.js, React, HTML, CSS, Tailwind CSS, Streamlit
- **Backend:** FastAPI, PHP
- **Databases:** MySQL, PostgreSQL, SQLite
- **Tools:** Git, GitHub, XAMPP, Render, Photoshop

PROJECTS

Mathingo | Thesis Developer

- Developed an adaptive educational platform that tailors questions based on learner skill level

- Built using FastAPI (backend), React (frontend), MySQL (database), and Tailwind CSS (UI styling)
- Designed and tested software prototypes and feature implementations aligned with system requirements
- Contributed to full-stack development including API design, database integration, and UI development

Nest AI | Lightweight Global Tech Solutions Corp., Quezon City

- Researched and tested AI-driven features including image generation capabilities
- Developed and tested ChatGPT API integration for AI-powered features
- Implemented agentic capabilities using LangChain, including tool-using AI agents
- Built a mock user interface using Streamlit for rapid prototyping and testing

Exorcism of Clarita | Video Game Project

- Developed a 3D horror game using Godot with a focus on atmospheric storytelling
- Implemented core gameplay mechanics such as player movement and interaction systems

FlowStock | Software Engineering 2 Developer

- Developed a web-based Point of Sale (POS) system using PHP, HTML, CSS, and MySQL (XAMPP)
- Implemented user authentication, inventory management, and full CRUD operations for product and sales data
- Built transaction processing with printable receipt generation for completed purchases

EDUCATION

Arellano University,
Bachelor's of Science in Computer Science

Manila
2026

Our Lady of Fatima University,
Academic Strand : STEM

Quezon City
2022
